Amy would like to develop this a little more.

1. Do we have any other evidence (pictures?) of spillage. Not sure if the complainant took any? **Unfortunately, there is no visual evidence of the April 2021 release. There is a police report that documents the release to some extent.**
2. What other enforcement options are available since 311e may not be an option? The OPA team can have a discussion about this. **At this point, since the tank trailer was moved from its location documented in the inspection, I think there are very few options. However, in the event the trailer is returned, perhaps we could move forward with an 311(e) order, or perhaps refer the matter to CID for investigation.**

Thanks - Fran
